

## List of Contents

### NUMBER 1

- |   |    |   |
|---|----|---|
| Jeffery K. Cochran,<br>Arvinth Murugan and<br>Vijayalakshmi Krishnamurthy | 1  | Generic Markov models for availability estimation and failure characterization in petroleum refineries                  |
| Guisseppe A. Forgionne  | 13 | Determining the financial feasibility of privatized military housing initiatives with DSS-delivered quantitative models |
| Francesca Fumero  | 33 | A modified subgradient algorithm for Lagrangean relaxation  |
| Prakash L. Abad   | 53 | Optimal price and order size for a reseller under partial backordering  |
| Kun-Jen Chung and<br>Chuan-Neng Lin                                       | 67 | Optimal inventory replenishment models for deteriorating items taking account of time discounting                       |
| Sharmila Shah,<br>John E. Mitchell and<br>Michael Kupferschmid            | 85 | An ellipsoid algorithm for equality-constrained nonlinear programs  |

### NUMBER 2

- |  |     |   |
|--|-----|---|
| Chi Chiang   | 93  | A note on optimal policies for a periodic inventory system with emergency orders                |
| James R. Swisher,<br>Sheldon H. Jacobson,<br>J. Brian Jun and<br>Osman Balci | 105 | Modeling and analyzing a physician clinic environment using discrete-event (visual) simulation  |
| Scott Webster and<br>Meral Azizoglu  | 127 | Dynamic programming algorithms for scheduling parallel machines with family setup times         |
| A. Sedeño-Noda and<br>C. González-Martin                                     | 139 | An algorithm for the biobjective integer minimum cost flow problem                              |
| W.K. Yeung, Ceyda Oguz<br>and T.C. Edwin Cheng                               | 157 | Single-machine scheduling with a common due window  |
| Wei-Chang Yeh  | 177 | Search for MC in modified networks  |
| W.J. Hurley  | 185 | The analytic hierarchy process: a note on an approach to sensitivity which preserves rank order |

### NUMBER 3

Marcos Singer	193	Decomposition methods for large job shops
Gianfranco Corradi	209	Higher-order derivatives in linear and quadratic programming
J. Leon Zhao and Hsing Kenneth Cheng	223	Graph indexing for spatial data traversal in road map databases
E. Mijangos and N. Nabona	243	On the first-order estimation of multipliers from Kuhn-Tucker systems
Julia A. Bennell, Kathryn A. Dowsland and William B. Dowsland	271	The irregular cutting-stock problem — a new procedure for deriving the no-fit polygon

### NUMBER 4

Alex Van Breedam	289	Comparing descent heuristics and metaheuristics for the vehicle routing problem
Micha Mandel and Gur Mosheiov	317	Minimizing maximum earliness on parallel identical machines
Shine-Der Lee	329	On solving unreliable planar location problems
Kun-Nyeong Chang and Dongwoo Kim	345	Optimal prioritized channel allocation in cellular mobile systems
B.P.M. Duarte	357	The expected utility theory applied to an industrial decision problem — what technological alternative to implement to treat industrial solid residuals
G. Peter Zhang, B. Eddy Patuwo and Michael Y. Hu	381	A simulation study of artificial neural networks for nonlinear time-series forecasting

### NUMBER 5

Yun Seong Eum, Kyung Sam Park and Soung Hie Kim	397	Establishing dominance and potential optimality in multi-criteria analysis with imprecise weight and value
Cem Canel, Basheer M. Khumawala, Japhett Law and Anthony Loh	411	An algorithm for the capacitated, multi-commodity multi-period facility location problem
O. Berman and K.P. Sapna	429	Optimal control of service for facilities holding inventory

I.M. Premachandra	443	An approximation of the activity duration distribution in PERT
S. Kalpakam and S. Shanthi	453	A perishable inventory system with modified $(S-1, S)$ policy and arbitrary processing times
Mani K. Agrawal and Salah E. Elmaghraby	473	On computing the distribution function of the sum of independent random variables
Jae Kyeong Kim and Sang Hyun Choi	485	A utility range-based interactive group support system for multiattribute decision making

#### NUMBER 6

Jianzhong Zhang, Chao Yang and Yixun Lin	505	A class of bottleneck expansion problems
Hong-fei Teng, Shou-lin Sun, De-quan Liu and Yan-zhao Li	521	Layout optimization for the objects located within a rotating vessel — a three-dimensional packing problem with behavioral constraints
James E. Falk and Vladimir E. Karlov	537	Robust separation of finite sets via quadratics
Tariq Aldowaisan	563	A new heuristic and dominance relations for no-wait flowshops with setups
Ling Wang and Da-Zhong Zheng	585	An effective hybrid optimization strategy for job-shop scheduling problems
Jaejin Jang, Jungdae Suh and C. Richard Liu	597	A new procedure to estimate waiting time in GI/G/2 system by server observation

#### NUMBER 7

Bertrand M.T. Lin and T.C. Edwin Cheng	613	Batch scheduling in the no-wait two-machine flowshop to minimize the makespan
Min-Sheng Lin, Ming-Sang Chang, Deng-Jyi Chen and Kuo-Lung Ku	625	The distributed program reliability analysis on ring-type topologies
Sheng-Pen Wang	637	Shape-preserving computation in economic growth models
Sakib A. Mondal and Anup K. Sen	649	Single machine weighted earliness-tardiness penalty problem with a common due date
Herbert Dawid, Johannes König and Christine Strauss	671	An enhanced rostering model for airline crews

- |  |     |   |
|--|-----|---|
| <b>Christos Koulamas and George J. Kyparisis</b> | 689 | The three-stage assembly flowshop scheduling problem                                |
| <b>Jatinder N.D. Gupta and Johnny C. Ho</b>      | 705 | Minimizing makespan subject to minimum flow-time on two identical parallel machines |

#### NUMBER 8

- |   |     |  |
|---|-----|--|
| <b>Gur Mosheiov</b>                                       | 719 | A common due-date assignment problem on parallel identical machines                                  |
| <b>Chiun-Ming Liu</b>                                     | 733 | Primal-dual methods for sustainable harvest scheduling problems                                      |
| <b>Chia-Shin Chung and James Flynn</b>                    | 751 | A newsboy problem with reactive production   |
| <b>Cüneyt F. Bazlamaçcı and Khalil S. Hindi</b>           | 767 | Minimum-weight spanning tree algorithms<br>A survey and empirical study                              |
| <b>Dirk Biskup and Martin Feldmann</b>                    | 787 | Benchmarks for scheduling on a single machine against restrictive and unrestrictive common due dates |
| <b>Yupo Chan, William B. Carter and Michael D. Burnes</b> | 803 | A multiple-depot, multiple-vehicle, location-routing problem with stochastically processed demands   |
| <b>Jacinto González-Pachón and Carlos Romero</b>          | 827 | Aggregation of partial ordinal rankings: an interval goal programming approach                       |

#### NUMBER 9

- |  |     |   |
|--|-----|---|
| <b>In Lee</b>  | 835 | Artificial intelligence search methods for multi-machine two-stage scheduling with due date penalty, inventory, and machining costs |
| <b>M.I. Vidalis and H.T. Papadopoulos</b>  | 853 | A recursive algorithm for generating the transition matrices of multistation multiserver exponential reliable queueing networks     |
| <b>Veronique Inghelbrecht, Bart Steyaert, Herwig Bruneel and Sabine Wittevrongel</b> | 885 | Buffer contents and cell delay in a rate adaptation buffer with Markovian arrivals  |
| <b>N.C. Simpson</b>  | 899 | Questioning the relative virtues of dynamic lot sizing rules  |
| <b>K.-J. Chung and S.-F. Tsai</b>  | 915 | Inventory systems for deteriorating items with shortages and a linear trend in demand-taking account of time value                  |

#### NUMBER 10

- |   |      |   |
|---|------|---|
| C.W. Chu, B.E. Patuwo,<br>A. Mehrez and G. Rabinowitz | 935  | A dynamic two-segment partial backorder control of $(r, Q)$ inventory system            |
| Shengxiang Yang and<br>Dingwei Wang                   | 955  | A new adaptive neural network and heuristics hybrid approach for job-shop scheduling    |
| A. Krishnamoorthy and<br>P.V. Ushakumari              | 973  | $k$ -out-of- $n$ : $G$ system with repair: the $D$ -policy                              |
| Peter Preston and<br>Erhan Kozan                      | 983  | An approach to determine storage locations of containers at seaport terminals           |
| Toshitsugu Otake<br>and K. Jo Min                     | 997  | Inventory and investment in quality improvement under return on investment maximization |
| Lawrence David Drees<br>and Wilbert E. Wilhelm        | 1013 | Scheduling experiments on a nuclear reactor using mixed integer programming             |
| A.J. Higgins  | 1039 | A dynamic tabu search for large-scale generalised assignment problems                   |

#### NUMBER 11

- |  |      |  |
|--|------|--|
| Hanif D. Sherali, Burak<br>Özdaryal, Warren P. Adams<br>and Naguib Attia | 1049 | On using exterior penalty approaches for solving linear programming problems   |
| Jacques A. Ferland,<br>Soumia Ichoua, Alain Lavoie<br>and Eric Gagné     | 1075 | Scheduling using tabu search methods with intensification and diversification  |
| Chih-Hsiung Wang and<br>Shey-Heui Sheu                                   | 1093 | Simultaneous determination of the optimal production-inventory and product inspection policies for a deteriorating production system |
| Jason Chao-Hsien Pan,<br>Jen-Shiang Chen and<br>Hung-Liang Cheng         | 1111 | A heuristic approach for single-machine scheduling with due dates and class setups   |
| Ibrahim Abdulla Ibrahim<br>and Said M. Selim                             | 1131 | Shortest paths in a lattice network: a comparative study   |

#### Note

- |                                     |      |  |
|-------------------------------------|------|--|
| K.F. Lam, H.W. Mui and<br>H.K. Yuen | 1141 | A note on minimizing absolute percentage error in combined forecasts |
|-------------------------------------|------|--|

# NUMBER 12

- |   |      |   |
|---|------|---|
| <b>Roman Novak, Jože Rugelj and Gorazd Kandus</b> | 1149 | A note on distributed multicast routing in point-to-point networks  |
| <b>Jamal Ouenniche and Fayez F. Boctor</b>        | 1165 | The multi-product, economic lot-sizing problem in flow shops: the powers-of-two heuristic                                   |
| <b>Guoqiang Peter Zhang</b>                       | 1183 | An investigation of neural networks for linear time-series forecasting  |
| <b>S. Kar, A.K. Bhunia and M. Maiti</b>           | 1203 | Inventory of multi-deteriorating items sold from two shops under single management with constraints on space and investment |
| <b>U. Al-Turki, C. Fedjki and A. Andijani</b>     | 1223 | Tabu search for a class of single-machine scheduling problems   |
| <b>Raymond L. Major and Cliff T. Ragsdale</b>     | 1231 | Aggregating expert predictions in a networked environment   |

## Note

- |                                    |      |   |
|------------------------------------|------|---|
| <b>Han-Lin Li and Jung-Fa Tsai</b> | 1245 | A fast algorithm for assortment optimization problems |
|------------------------------------|------|---|

# NUMBER 13

- |  |      |   |
|--|------|---|
| <b>Ingo Hofacker and Rudolf Vetschera</b>                                  | 1253 | Algorithmical approaches to business process design   |
| <b>Yi-Kuei Lin</b>   | 1277 | A simple algorithm for reliability evaluation of a stochastic-flow network with node failure                |
| <b>Rafael Martí and Vicente Estruch</b>                                    | 1287 | Incremental bipartite drawing problem   |
| <b>Dieter Fiems, Bart Steyaert and Herwig Bruneel</b>                      | 1299 | Performance evaluation of CAI and RAI transmission modes in a GI-G-1 queue                                  |
| <b>S. Kar, A.K. Bhunia and M. Maiti</b>                                    | 1315 | Deterministic inventory model with two levels of storage, a linear trend in demand and a fixed time horizon |
| <b>Stan Lipovetsky and W. Michael Conklin</b>                              | 1333 | Multiobjective regression modifications for collinearity  |
| <b>Hong Suk Choi, Heesoo Lee, Ki-Dong Lee, Sehun Kim and Jong Hyup Lee</b> | 1347 | Optimal locations of switches and interconnections for ATM LANs   |

NUMBER 14

- |                                      |      |   |
|--------------------------------------|------|---|
| Young H. Chun                        | 1367 | Optimal partitioning of groups in selecting the best choice                             |
| M. Reza Zamani                       | 1387 | A high-performance exact method for the resource-constrained project scheduling problem |
| Adil Baykasoğlu and Nabil N.Z. Gindy | 1403 | A simulated annealing algorithm for dynamic layout problem                              |
| Eiji Takeda                          | 1427 | A method for multiple pseudo-criteria decision problems                                 |
| Ming-Jong Yao                        | 1441 | The peak load minimization problem in cyclic production                                 |
